CAPABILITY STATEMENT

- **Utility Construction & Powerline Installation:** Complete design and construction of overhead and underground distribution systems, transmission lines, and underground networks for residential, commercial, and municipal projects.
- **Storm Damage Repair & Emergency Power Restoration:** 24/7 disaster response for hurricanes, wildfires, and floods, restoring overhead and underground power systems safely and efficiently.
- **Substation Construction & Upgrades:** Civil work, grounding, structural installation, and electrical connections for new substations and major upgrades, ensuring reliable grid performance.
- **EV Charging Infrastructure:** Turnkey installation of public, commercial, and private EV charging stations, including trenching, conduit installation, power connections, and concrete work.
- **Fiber Optic & Communication Line Installation:** Trenching, conduit installation, fiber pulling, and terminations for high-speed fiber optic and communication networks for cities, campuses, and utilities.
- **System Maintenance, Upgrades & Pole Replacements:** Replacement of poles and transformers, conductor upgrades, and capacity expansion to maintain safe and modern electrical infrastructure.

PAST PERFORMANCE

- **Fort Bliss, El Paso, TX:** Completed multiple overhead electrical projects for Rio Grande Electric Coop, finishing early and with zero safety incidents.
- **The Villages, FL:** Provided rapid hurricane disaster response for OneSource Restoration, rebuilding 31 miles of energized power lines and installing transformers and poles.
- **Meridian, FL:** Supported Tri-County Cooperative Electric's hurricane restoration with 22 miles of line rebuild, installing poles, transformers, and underground vault work.
